Quality & Environmental Policy

Accutronics Ltd, part of Ultralife Corporation, is a leading independent battery design, development and manufacturing company for high-performance portable and handheld electronic devices, specialising in the development and manufacture of 'smart batteries' and battery chargers.

Our staff are committed to providing premium products and services to all of our customers and ensuring our actions have a minimal impact on the environment.

In order to achieve these overall objectives, we have established key Quality and Environmental objectives, based on the requirements of recognised International Standards ISO 9001, ISO 13485 and ISO 14001. These objectives provide a framework for enhancing customer satisfaction, reducing the effect on the environment and improving overall product and business performance.

Maintaining an Integrated Management System (IMS) assists Accutronics in demonstrating our commitment to our compliance obligations, protecting the environment and preventing possible pollution, promoting continual improvement and enhancing our environmental performance. We're always open to customer needs, always willing to change and always determined to deliver.

This policy supports the overall management strategy of Accutronics Ltd and acknowledges the ongoing commitment of all employees to increase our reputation as a market leader, driving innovation and efficiency into the portable power industry.

Michael Allen
